I do not agree with the Legislature Secretary in his opinion that the observance of the maximum distance of 100 yards between any two standpipes is only optional so long as a water tax is not imposed. The introduction of a system of ~~water supply~~ pipes is optional with the municipality but should they attempt one section 197 lays down the purpose for & the manner in which they may exercise certain powers in defeasance of the right of the public to an unobstructed user of the roads; in other words the municipality may exercise these powers of entry, erection and distinction of the public roads, for laying down stand pipes for the gratuitous use of the rate-payers & the said stand-pipes shall be at not more than 100 yards apart. The section is peremptory & cannot be whittled down by subsequent [illegible] as to when a [illegible] is [illegible].

MYSORE P. W. DEPARTMENT,
CENTRAL OFFICE,
Bangalore 16 Dec 1887 89

From — Chief
The ~~Superintending~~ Engineer of Mysore. 89 (2)

To The Chief Secretary to the
Govt of Mysore.

With reference to the concluding sentence of Clause 197, page 39 of Municipal Regulation I. of 1888, under the head "Lighting and Water Supply," which lays down that "Stand-pipes should be so placed that there shall not be a greater interval than 100 yards between any such Stand-pipes," I have the honor to suggest a modification of the distance between Stand-pipes, as those in Mysore are not all at 100 yards distance from each other, and such a fixed limit would be inconvenient; and probably unnecessary in many places. The distance must depend on the lie of the Streets, or open Spaces, and on the denseness of population in each locality; and it would probably be sufficient if it was ruled that the distance apart of Stand pipes should be such as the Municipal Board may decide to be suitable and convenient. Any hard & fast limit of distance is hardly required.

I have the honor to be
Sir,
your most obedient servant.

No.

In reply to the Chief Secretary's No. 12332 dated 7th February 1891, 1628. has the honor to state, that section 197 of the Municipal Regulation read along with the three following sections - clearly shows that: whereas the Municipality has no intention of imposing a water-rate under the Regulation it is not-bound by the provisions of the first named section as regards the distance between stand-pipes, or as regards putting up any stand-pipes at all. The obligation arises only when the tax is imposed.

To, Dated 14-89-4

The Chief Engineer of
Mysore.

From the Secretary to Govt. No 36139 2/1892-L225-

Sir,

With reference to your letter, No. 5278 of 16-12-89, suggesting a modification of the limit of distance between Standpipes for water-supply prescribed in Section 197 of the Municipal Regulation III of 1888, I am directed to inform you that the obligation prescribed in Section 197 of the Regulation arises only when a water-rate is imposed. As no water-rate is now imposed by the Mysore Municipality no objection can be taken under the Regulation to the existing positions

positions of the Stand-pipes
2. But sooner or later a
water-tax will have to be
imposed; and as a revision
of the Municipal Regulation
is under contemplation
the opportunity which
will be presented by
this revision will be
taken for modifying
the limit now prescribed.
To leave the limit en-
tirely to the discretion
of the Local Board
as suggested in your
letter is considered —
inexpedient It may be
necessary to prescribe a
definite limit as the
maximum distance
between standpipes for
supply of taxed water,
and I am to request
that you will favour
Government

Wml 14-89-4.

Government with your opinion as to what such maximum limit may be for Mysore city

I have &c.

Chief Secretary

Bangalore 2nd August 1892.

From Lieut: Col: D. Mack: Campbell R.E.
~~The~~ Superintending Engineer of Mysore.

To

SIR,

The Chief Secretary to the Dewan
Mysore
of Ootacamund.

With reference to your letter no: 1201/23 dated 1st May /91, asking for opinion as to the maximum distance between stand-pipes that should be adopted for the supply of water in the Ootacamund City, I have the honor to inform you that I do not think it is necessary or even at all advisable, to prescribe any such definite maximum limit.

2 I quite agree with the remarks of the late Chief Engineer in his no: 5278 dated 16th December /89, that "the distance must depend on the lie of the streets, or open spaces, and on the denseness of the population in each locality; and it would probably be sufficient if it was ruled that the distance apart of stand-pipes should be such as the Municipal Board may decide to be suitable and convenient." Any hard and fast limit of distance is not

required."—
